

# LOCOMOTIVE SPEAKER PANEL

## Model 61-95014

### **Application:**

The 61-95014 Locomotive Speaker Panel is designed to allow the monitoring of the locomotive's radio, typically at the Conductor's station. The Panel also provides for the attachment of an AAR standard handset, allowing an operator to talk out over the radio.

### **Features and Specifications:**

- Heavy duty metal construction. Front panel fabricated of 16 ga. cold rolled steel.
- 5 Watt limiting amplifier.
- Speaker volume control.
- Red PTT LED.
- Standard AAR 6-conductor for the handset.
- Standard AAR 6-conductor to the locomotive harness:
  - Mic High & Low,
  - "Ear" audio,
  - Ground,
  - Push-to-Talk,
  - +13.6 Volts DC.
- Power requirements: 12 Volts DC (nominal). The units draws app. .2 amps when idle, .3 amps when speaker volume is about halfway and .8 amps when the volume is turned up high.
