

LOCOMOTIVE SPEAKER PANEL Model 61-95015

Application:

The 61-95015 Locomotive Speaker Panel is designed to allow the monitoring of the locomotive's radio, typically at the Conductor's station. The Panel comes equipped with a Motorola DTMF microphone.

Features and Specifications:

- Rugged metal construction. Front panel fabricated of 16 ga. cold rolled steel.
- Receives high-level radio audio and directs it to an 8 Ohm speaker (there is no amplifier in this unit).
- Speaker volume control.
- Heavy duty 4" speaker.
- Standard AAR 6-position connector to the locomotive harness:
 - 2 conductors for microphone audio,
 - 2 conductors for push-to-talk,
 - 2 conductors for speaker audio.
- Equipped with Motorola HMN1037 microphone with DTMF touchpad.
